

**Automotive Components Floby (AC Floby) has spent decades manufacturing products for the automotive industry, while at the same time amassing extensive knowledge of both machining and installation. The result is a company that today produces products such as brake discs, wheel hubs and connecting rods for manufacturers throughout the world, to the highest industry standards of quality, precision and environmental impact.**

Our management system is developed to ensure that we follow and execute the demands that our surrounding world impose on us, and clarify what responsibility and commitment we have towards our stakeholders that includes society, customers and suppliers, as well as employees and organization.

We work with distinct routines and processes to secure and develop our work from a quality-, environmental and work environment point of view. All employees of AC Floby contributes on a daily basis to make sure that the management system is updated and complied with.

The management system covers the entire business as well as the requirements of the management system according to ISO 9001, the IATF 16949, ISO 14001 and ISO 45001. Exceptions apply to Section 8.3 (Design and Development of Products and Services) of IATF 16949. The reason for excluding this section is that the business does not develop its own products.
